

Create a 15-second AI-generated video based on an event, situation, or story connected to Marwadi University. Your video should tell a small visual story within 15 seconds.

You may create the video as:

- 3 × 5-second clips
- 5 × 3-second clips
- One continuous 15-second generation

You may choose any theme:

- Marwadi University in 2050
- Future Tech Fest
- Hackathon Night
- Convocation of the Future
- A Day at Marwadi University
- Breaking News at Marwadi University
- If Marwadi University Had a Time Machine
- Unexpected Event on Campus
- Future Classroom
- Future Laboratory
- Campus Advertisement
- Your own creative idea

Your submission must include:

One Document file/pdf uploaded on your drive and a public access link containing:

15-second final video link

Prompt(s) used

Name of the open-source video generation model

Brief explanation of how the video was generated

If multiple clips were generated, show how they were combined

Important: The objective is not to simply generate a beautiful video. The video should demonstrate that you can use prompt engineering to control the scene, characters, environment, camera movement and visual storytelling.
